

Photop and Pavilion to collaborate in laser development

May 19, 2005, Fuzhou, China-Photop Technologies (PHOTOP) and Pavilion Integration Corporation (PIC; Fremont, CA) today announced a co-development and joint manufacturing agreement targeting robust and cost competitive red, green, and blue lasers for the demanding biotech, graphics, and metrology markets. PIC will focus on innovative laser designs, robust product development, and effective global marketing and customer support for the biotech and medical

instrumentation market. PHOTOP will leverage its photonics manufacturing platform to consistently manufacture laser products in cost effective ways.

“We are pleased that both companies have joined efforts for quick time-to-market and manufacturing of PIC-branded products,” said Ningyi Luo, CEO of PIC. “PHOTOP is outstanding at what they do, allowing us to focus on rapid product development to meet the needs of specific OEM customers.”
